

Supply Management System Design

Aerospace

Revision 1.3
May 2020

Edition 3

Note 2: Certain laboratories may utilize AS/EN/ISO 9000 provided that the testing of materials, and the supplier participating in the testing, are completed by their direct customer. Additionally, for materials controlled by DRMS20021, requirements for testing are provided in DRMS20021.

ROLLS-ROYCE

Rolls-Royce	Test Description	Rolls-Royce	Rolls-Royce
Material Test Spectrograph (Continued Standards)	Chemical Analysis Spectrograph (NDE)	6223	50
Continued Standards	Continued Standards	6205	75
Salt Spray ASTM B117	Corrosion-General	B201	Q
	Microhardness-Interior		
Material Test	Near Surface Examinations Microhardness / Surface	B208	15
	IGA/IGO	B214	L7
	Grain Size	B218	L11
	Metallography-Macro	B205	XL
	Hardness - Rockwell		

Note:

1. Per SABRe Aerospace Supplier Management System Requirements dated May 2020 - Does not feature Rolls-Royce Approval. All production material - chemical metallurgical-mechanical testing.
2. All Rolls-Royce specifications and requirements for the testing must be flowed by DDMS2002.
